The laws of physics are not apart from or independent of the Universe. The Universe - Existence - exists.

There are no laws that govern Existence for that would imply something outside, independent of, and apart from Existence. The notion of perpetual motion, in any form, has no meaning

When I proposed the Subversive Guitarist column to my Premier Guitar pals in 2018, we figured on 20 or so installments, to be followed by a book version of the series. For once, things went precisely as planned: This is the final column in the series, and PG will issue a book version (with lots of extra material!) later this year.
