organs, including the lungs and the diaphragm.

## **27 Respiratory System Facts for Kids, Students & Teachers**

The human respiratory and circulatory systems work together to supply the body with oxygen and get rid of waste carbon dioxide. While the former deals with air and the latter with blood, they work together seamlessly by coordinating the functions of the many parts of each system.

## **The Respiratory and Circulatory System in the Human Body ...**

The respiratory system is vital to the whole functioning of the body. This system is essential in bringing in the oxygen required by every aspect of the body, from oxygen the cells need to function and replace cells that have died to the oxygen the muscles need. It also removes harmful gases such as carbon dioxide from the body.

## **What Is the Importance of the Respiratory System?**

organism respiration. process of gas exchange- the release of carbon dioxide and the uptake of oxygen between the lungs and environment. \* what is the basic function of the human respiratory system. to bring about the exchange of oxygen and carbon dioxide between the air and tissue.

## **the human body respiratory system Flashcards | Quizlet**

The human respiratory system is a system of organs responsible for inhaling oxygen and exhaling carbon dioxide in humans. The important respiratory organs in living beings include- lungs, gills, trachea, and skin.

## **Human Respiratory System - Diagram, Respiratory System ...**

Those air sacs are loaded with ACE2, the protein that the coronavirus uses as a gateway into cells, where it replicates and emerges to infect adjacent cells. Severe infection can lead to pneumonia as the lung tissue fills with fluid and pus, reducing the air sacs' ability to transfer oxygen into the blood.

## **How coronavirus affects the human body, system by system**

The major respiratory structures span the nasal cavity to the diaphragm. Functionally, the respiratory system can be divided into a conducting zone and a respiratory zone. The conducting zone of the respiratory system includes the organs and structures not directly involved in gas exchange (trachea and bronchi).
